

## REMARKS

In response to the Restriction Requirement, applicants elect, without traverse, Group I (claims 1, 2, 3, and 8-14). Claims 1, 2 and 8-14 are generic, and claim 3 reads on the elected species. Applicants further elect the following, pursuant to subsidiary aspects of the restriction:

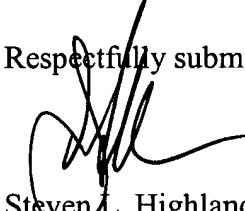

- (A) epidermal growth factor (all claims generic)
- (b) prostate cancer (all claims generic)

Applicants believe the foregoing is a complete response to the restriction.

Applicants wish to point out that claim 1 is generic to the tissue source (Groups 1-5), growth factor receptor (A-M) and cancer (a-t). As such, claim 1 is a true linking claim for each of the 1300 inventions set forth. Thus, upon allowance of the elected species, applicants are entitled to further examination of other species and/or the generic claim.

Should Examiner Ungar have any questions regarding this response, a telephone call to the undersigned is invited.

Respectfully submitted,

Steven L. Highlander
